

小学数学小数练习题-3

一、直接写出得数

$$\begin{array}{llll} 10.53+0.4= & 7.6-6.7= & 4+1.6= & 3.86-1.6= \\ 3.82+2.24= & 6.7-3.44= & 6.82+1.8= & 3.5+2.4= \\ 6.6+0.4= & 7-3.77= & 15.46-6.6= & 7.5+1.25= \end{array}$$

二、填空

(1)用小数表示结果

$$\begin{array}{ll} 5\text{米}7\text{厘米}=(\quad)\text{米}, & 8\text{元}4\text{角}7\text{分}=(\quad)\text{元} \\ 3\text{吨}50\text{千克}=(\quad)\text{吨}, & 4\text{千米}5\text{米}=(\quad)\text{千米} \end{array}$$

$$\begin{array}{llll} (2)15\text{个}0.1\text{是}(\quad), & 270\text{个}0.01\text{是}(\quad) \\ 0.26\text{里有}(\quad)\text{个}0.01, & 0.3\text{里有}(\quad)\text{个}0.01, & 0.1\text{是}0.01\text{的}(\quad)\text{倍} \end{array}$$

(3)把下面各数改写成计数单位是 **0.001** 的小数

$$0.3= \quad 12= \quad 0.3500= \quad 3.06=$$

三、列竖式计算

$$7.55+5.68= \quad 10-9.57= \quad 11.35+64.5= \quad 19.08-4.28=$$

四、计算 (能简算的要简算)

$$(1) 38.67+68.23+45.8 \quad (2) 98.2-37.18-10.82$$

$$(3) 56.23+(31.07-54.1) \quad (4) 32.6+58.04+61.96$$

$$(5) 100-(28.4+32.05) \quad (6) 6.72-(1.72+2.85)$$
