分数计算与比较大小作业

一、计算题

1.
$$\frac{2}{3} + 9\frac{2}{3} + 99\frac{2}{3} + 999\frac{2}{3}$$

$$2.\left(64\frac{7}{16}-32\frac{7}{18}\right)-\left(16\frac{7}{20}-8\frac{9}{16}\right)-\left(4\frac{11}{18}+2\frac{11}{20}\right)$$

3.
$$\left(20\frac{1}{3}-18\frac{1}{5}+16\frac{1}{7}+14\frac{2}{3}-12\frac{4}{5}+10\frac{6}{7}\right) imes\left(9-\frac{25}{31}\right)$$

4.
$$\left(3\frac{2}{3}+1\frac{1}{7}\times9\right)\div\frac{5}{2}-\left(2\frac{2}{3}+\frac{2}{7}\right) imes\frac{2}{5}$$

二、分数大小比较

- 5. 比较大小
- $(1) \ \frac{4}{17} \square \frac{5}{19} \qquad (2) \ \frac{4}{45} \square \frac{6}{65} \qquad (3) \ \frac{44}{47} \square \frac{15}{16}$
- 6. 由小到大排列
 - $\frac{5}{7}$, $\frac{7}{9}$, $\frac{3}{4}$, $\frac{2}{3}$
